FIBER OPTIC Splice Closure

General Description

The Splice closure is an indispensable equipment used in Fiber Communication System, play the roles in sealing, protection, installation of fiber connector head and storage. It is applicable well in cable splicing and with the protection function on fiber optic connect head.

Features

- ✦ Suitable for straight-through, diverging and connection of FTTH, FTTB passive network
- ✦ Use material of high-strength PP plastics+GF
- ✦ Corrosion resistant, aging resistant
- ✦ Trays can be increased and reduced according to the application.
- ✦ Good properties of dust, and moisture proofing

Application

- ● Telecommunication subscriber loop
- ● Fiber to the home(FTTH)
- ● LAN/WAN

Technical Data

Work Temperature	-40℃ ~+75℃
Relative Humidity	≤85%
Atmospheric Pressure	70Kpa~106Kpa
Standard	YD/T814.1-2004
No. of Cable Inlet/Outlet	One Inlets, Four Outlets
Max capacity	24 cores(double layers of sleeves) x 4cassettes=96 Core

Dimension: 337（H）* φ166mm
